**\*\* Forest Service will provide locally adapted seed for use by the Purchaser on the sale. A co-op deposit of \$0.02/CCF will be collected from the Purchaser to cover the cost of culturing, growing, and harvesting seed from native plants.**

1/ For sales in Oregon, the seed shall meet the State certification specifications. Seed must be packaged in containers carrying official certification labels sewn in, glued to, or printed upon the container, with the following information:

1. Variety (if certified as to variety) and kind.
2. Quantity of seed (pounds or bushels).
3. Class of certified seed (blue tags for certified seed).
4. Inspection or lot number traceable to the certifying agency's records.

For sales in Washington, the seed shall be labeled as "Prohibited and Restricted Noxious Weed Free for the State of Washington." The purchaser shall furnish a copy of the seed analysis.

For state of California lands in Region 6, seed must be certified by the state of California, or by an independent agency or company that is approved by the state of California for "prohibited and restricted noxious weed free for the state of California."

For mixtures of seed, each ingredient in excess of 5 percent must be listed with its percentage by weight and its germination percentage.

Legumes must be inoculated with nitrogen fixing bacteria before planting. The label must show the expiration date of the inoculant.

All seed treated with a fungicide or pesticide must be labeled that it is "treated" giving the name of the chemical used, and an appropriate warning or a caution statement.

2/ Fertilizer shall be a standard commercial fertilizer with guaranteed analysis of contents clearly marked on containers.

3/ Mulch shall meet the appropriate State's certification specifications, with evidence of its certification traceable to the certifying agency's records.

TABLE PURSUANT TO CT6.41# - SPECIFIC REQUIREMENTS    (01/2000)

FELLING METHODS

Cutting Units

Mechanical felling equipment restricted to  
designated trails.

All

No equipment operation within 12 feet from the  
edge of the protected site. Trees will be  
directionally felled away from the protected  
site.

33, 76, 78, 99

FELLING EQUIPMENT

Cutting Units

Mechanical felling equipment must be equipped  
with a 25 foot or longer boom. Width of equipment  
shall not be wider than 12 feet.

All

TABLE PURSUANT TO CT6.42# - YARDING/SKIDDING REQUIREMENTS  
(06/2010)

<u>YARDING/SKIDDING REQUIREMENTS</u>	<u>CUTTING UNITS</u>
60 feet minimum trail spacing except where trails converge or unless approved otherwise by the FS.	All
Skidding tractors/forwarders shall be no more than 12 feet wide, including the blade	All
All logs/trees shall have one end suspended during skidding or forwarding	All
Utilize existing skid trails and landings where practicable.	
No landing, decking or skidding shall occur outside harvest units or in natural, non-forested openings unless approved in advance of operations.	All
Fowarder required. Equipment must provide full suspension of logs and operation is restricted to approved trail locations.	1, 4, 19, 21, 23, 27, 28, 30, 30A, 31, 32, 34, 35, 48, 63, 64, 68, 76, 78, 83, 99
Whole Tree Yarding is required.	2, 2A, 4A, 5, 5A, 8, 12, 13, 14, 16, 17, 18, 20, 24, 25, 26, 33, 47, 49, 51, 52, 84, 86, 87, 89, 92
No equipment operation within 12 feet from the edge of the protected site.	33, 76, 78, 99

SPECIFICATIONS PURSUANT TO CT6.74# - SLASH TREATMENT REQUIREMENTS (02/2002)

**Whole Tree Yarding (WTY)**, Cutting Units: 2, 2A, 4A, 5, 5A, 8, 12, 13, 14, 16, 17, 18, 20, 24, 25, 26, 33, 47, 49, 51, 52, 84, 86, 87, 89, 92.

Except for normal breakage, tops and limbs shall be skidded/yarded to the landing attached to the bole.

**Pile Landing Slash (PL)** Cutting Units: 2, 2A, 4A, 5, 5A, 8, 12, 13, 14, 16, 17, 18, 20, 24, 25, 26, 33, 47, 49, 51, 52, 84, 86, 87, 89, 92.

Slash and other debris resulting from Purchaser's operations that has accumulated on landings that is greater than 1 inch in diameter or greater than 8 feet in length shall be piled for burning by the Forest Service.

Construction of landing piles: Piles shall contain little or no soil. Accumulations of soil that remain after Forest Service Burning will be leveled to normal ground contour. Slash piling operations shall not unnecessarily damage young growth or other trees to be reserved. Slash piles shall be located away from residual trees and young growth to prevent damage during pile burning.
